

COMPRESSION LATCH Ø 76 KIT, LOCKABLE

Short Description

This lockable flush-mounted stylish compression latch will keep your storage dry, also in the roughest weather. It is ideal for use on all deck hatches from a small anchor box to a big machine room hatch.

Kuvaus

The lockable compression latch is made of 316 stainless steel with a polished top surface. The built-in spring load allows for a 4 mm stroke that will provide a watertight seal and dampens vibrations. For safety reasons, you can fold down the lift handle when the latch is in an open position.

The compression latch is supplied in a complete kit with:

- Spacers for different bulkhead thicknesses
- A two-holed cam for maximum mounting flexibility
- Two keys for the locking mechanism

Installation is very simple, you only need to make one single Ø 63.5 mm hole.

Variations

Item no	Paneelin paksuus (t)	Säätövara	Materiaali	Pintakäsittely	Tuote
210240	2.0 - 22.5 mm	18.0-44.0 mm/69.5-99.5 mm	HST (AISI316)	Kiillotettu	Offset cam
