

Specifications:

Voltage:	10-30vDC
Switch Options:	8 Momentary w/LED 8 Latching/Toggle/Rocker - no/LED 4 Latching/Toggle/Rocker - w/LED
IP Rating:	IP67, Completely Sealed
Housing:	UV Resistant Composite Plastic

Key Features:

- Assign Poco System virtual commands to physical switches.
- Connect up to 8 mechanical switches to one S8 module
- Control light intensity via mechanical switch
- Cycle through "Switch Chooser" commands via mechanical switch.
- Completely water sealed. IP67 compliant.
- 3 Year warranty - proudly designed and manufactured in the USA.

Other Available Expansion Modules:

Pico C4 - provides Poco or TTP control of third-party RGB or RGBW lighting accessories. This means that everything from lighted speakers to cupholders can be controlled through the Poco system. On vessels not equipped with the Poco system, the Pico C4 provides control of color and intensity through any normal on/off switch, using Lumitec's field-proven TTP protocol.

Pico P1 - acts as an in-line solid-state relay, controlling any large load up to 20 Amps with on/off and PWM dimming control. When used in conjunction with a Poco module, lights and other loads can be controlled through an on-board MFD, smartphone or tablet.

Poco S8 Expansion Module

Pico Expansion Modules are designed to expand the capabilities of the already powerful Poco Digital Lighting Control system:

Pico S8 - provides the ability to assign Poco virtual switch commands to physical mechanical switches (8 max). This means that your MFD can remain on a dedicated screen, or even be turned off, and a physical switch will activate the virtual switch command through the Poco module.

Product Details:

SKU	POCO CONNECTION	OUTPUTS	VOLTAGE
101684	Required	8 Switch Max	10-30vDC

Features:

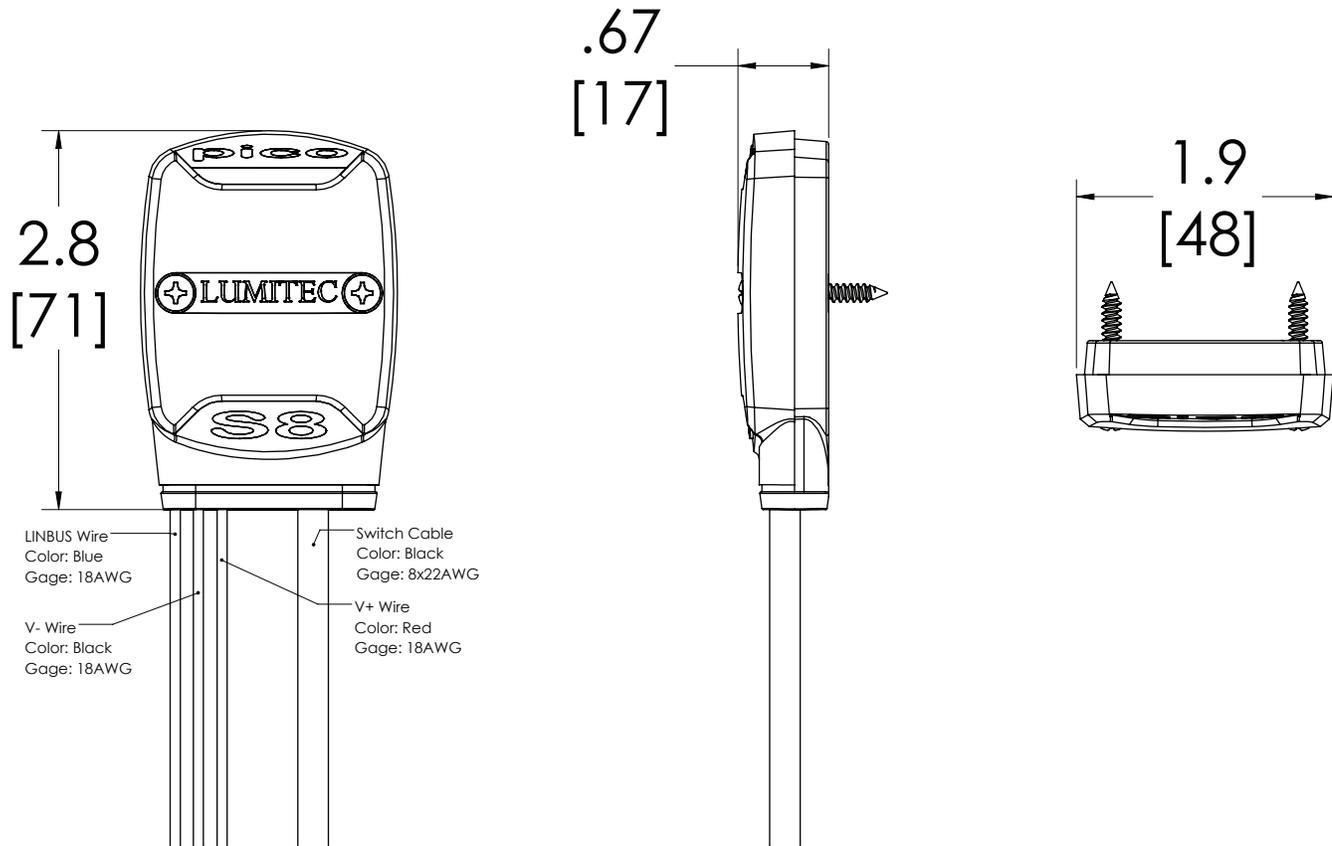

Dimensions:

Pico S8 - Expansion Module

Width: 1.9in (4.82cm)
 Height: 2.8in (7.11cm)
 Depth: 0.67in (1.70cm)

Switch Recommendation

Momentary (illuminated)

- Momentary: off - (on)
- Push Button
- SPST - Normally Open N.O.
- Illuminated
